## Possibly the toughest and most waterproof fishing Ruck Sack available on the market!

There are many ruck sacks on the market but many fail the test of water ingress and rugged use. Therefore with much research and development Vass have now introduced the new heavy duty DryRuckSack for fishing which combines tough construction, water protection for your kit within and comfort when trekking to your fishing location. No need to buy separate rain covers for your ruck sack now!

Features include:

- 'Fold Over Seal' entry at top of bag
- Padded back area for comfort
- Wide shoulder straps with padding for comfort
- Shoulder straps are adjustable
- Waist and chest fastening straps with quick release buckles
- Front elasticated external mesh pocket
- Smaller side (left and right) elasticated external mesh pockets
- Front elasticated cord lacing for securing larger items externally with adjustable stoppers
- Wipe clean material (externally and internally) due to smooth coated finish

Colour: Titanium Grey/Black

Size: 40Litre

Product Code: VG500-90

Left and right side pockets

Additional chest and waist straps

## VASS DRY RUCK SACK

Available on selected Vass Waders and Vass Boots

### New Vass Mega-Stud Edition

In addition to Vass's usual high quality studded sole options, Vass have announced the introduction of their new Vass Mega-Stud. Not only does the sole offer more studs but the Vass Mega-Studs are longer and protrude a good 4mm from the chunky cleated sole. These are combined with a selection of standard Vass studs which are placed specific areas of the sole create optimum grip you can rely on!

Both the original Vass Studs and the new Vass Mega-Studs boast a Tough Tungsten Core ensuring a spike like grip coupled with hard wearing properties. This provides even more grip on slimy/mossy rock and stony surfaces. If you are fishing steeper grassy banks the Vass Mega-Stud provides extra grip by clawing into the ground (similar concept to rugby boots). The base of the studs are machined deep into the sole and flanged ensuring that they don't drive through your foot over time. This also helps distribute your weight more evenly over the sole of your foot. Vass Mega-Stud edition is now available on all Vass products (including waders) using the new Vass Boots.

# VASS BOOT

New Black  
from Spring 2017

Green

see page 7 for details

### Vass Boot

Euro	39	40/41	42	43	44/45	46	47

(note sizes are more fitted on this style than our usual Vass Boot and Vass R-Boot styles. Customers may need to go a size larger depending on preference).

# ENGINEERED TO BE TOUGHER

Many breathable waders are designed for game fishing and sometimes struggle in harsher environments.

The new Vass-Tex 305 5L Breathable Wader has been designed and developed for the most hostile sea fishing environments. Using the tried and tested Vass Boot as its base then built up using the most advanced material technology Vass have created the ultra tough and reliable Vass-Tex 305 5L.

It's very tough, breathable and above all, in many cases, up to three times more waterproof than other leading breathable waders.

To ensure all aspects of the Vass Breathable Waders are up to the job, Vass have used the new Vass-Ultra 25mm Triple Seal Non Stitch Technical Seam, although developed for the more extreme sea fishermen its durability and reliability also appeal to many other forms of fishing.

# VASS-TEX 305-5 LAYER TOUGH BREATHABLE CHEST WADER

Euro	39	40/41	42	43	44/45	46	47	48

The Vass-Tex 740E SuperNova range has earned the right to be the 'Best PVC Wader' on the market. However as part of Vass's constant development this tough wader has become tougher! The Vass-Tex 740E SuperNova now boasts the addition of the New reinforced 'Vass Boot' as well as the addition of front D-Rings on the chest wader for attaching your fishing tools or chest bag.

Many of you have probably experienced problems with other brands of PVC waders letting you down or finding Neoprene and breathables too delicate for the job! These are the reasons why Vass have continued to develop the premium 'Vass-Tex 740E' Waders which offer you the most advanced and toughest PVC wader on the market. In addition to high quality of manufacturing and raw materials used, Vass have combined over 10 market leading features which include exclusive Vass-Tex 740 'Heavy Duty' material (smooth thick PVC outer with soft flexible polyester reverse) and now the new Ultra Chunky 'Vass Boot' to mention just a few.

## Thigh Wader

VC740-60E Non Studded

**ENGINEERED TO BE TOUGHER**

ENGINEERED TO BE TOUGHER

As part of Vass's constant development Vass have introduced the 'Team Vass 700' edition of the tried and tested Vass-Tex 700 chest wader. The 'Team Vass 700' chest wader boasts designer looks along with extra features such as D-Rings to hang tools and double reinforced knee area.

Features also include the tough Vass boot which has a wider calf and foot fitting for comfort. This Vass wader range uses the high quality 'Vass-Tex 700' smooth PVC outer (Titanium Grey) with a soft polyester reverse (slight stretch for comfort but also acts as a shock absorber on the seams). The body is fused with our New 'Vass Boot' Tough Chunky Yellow Soled boot offering comfort, reliability and reinforced hard wearing properties. Benefitting from Vass's usual high standard of manufacture and materials the Team Vass 700 wader also includes features such as Quad-Welded Seams, Elasticated & Box stitched brace loops, Easy repair material (see our repair guide) and internal draw-cord in the chest wader for safety and comfort. This wader is a great balance between the Vass-Tex 740 and 700 wader!

# TEAM VASS 700 EDITION WADER

## Features Include

- Double layer reinforced knees
- 2 D-Rings on chest for attaching tools (cutters, hook remover etc)
- New Titanium colour with carbon black trim (goes well with the Team Vass 175 Titanium smock)
- Box stitch reinforcement with elasticated brace loop with a quick release buckle
- Internal pocket
- Internal draw-cord around the chest
- Quad-Welded seams for ultimate strength
- Large heel kicker on boot
- High Quality Vass Boot, wider calf and foot fitting for comfort

Non Studded

Tungsten Carbide Studded Sole. These studs provide extra grip on slippery, mossy surfaces

# VASS-TEX 600

The Vass-Tex 600 series range offers a very high quality wader at fantastic value for money. Features include sturdy PVC Wellington boot fused with the new Vass-Tex 600g (PVC/ Polyester material) body to ensure reliability and comfort are achieved. An internal pocket and wider braces are also included in this wader. Unlike other manufacturers in this price category Vass are pleased to offer the option of 'Tungsten' studded soles which makes the 600 series probably the best value Studded PVC wader on the market!

# VASS-TEX 700 S5 REINFORCED SAFETY WADER

The highest quality PVC wader available in its category!

Heavy Duty Vass-Tex 700 Series material with flexible bi-stretch properties for comfort and reliability.

Introducing the Vass-Tex 700 S5 & Reinforced Safety Waders. This wader uses the tough high quality Vass-Tex 700 smooth PVC outer with a soft polyester reverse (slight stretch for comfort but also acts as a shock absorber on the seams). The body is fused with the S5 (Steel Mid Sole and Toe) reinforced Chunky Soled boot offering comfort, reliability and ultra hard wearing properties. Benefitting from Vass's usual high standard of manufacture and materials the Vass-Tex 700 Safety range also includes features such as Quad-Welded Seams, Reinforced Knees, Elasticated & Box stitched brace loops, Easy repair material (see our repair guide) and internal draw-cord in the chest wader for safety and comfort.

Note: It is the responsibility of the wearer to understand that the studs affect the grip of the sole i.e studs improve the grip on slippery mossy surfaces however can reduce grip on plain concrete surfaces!

Code:  
VA175-13

Many fishermen (particularly sea) experience heavy rains and winds during fishing and found that their current waterproofs aren't quite as waterproof as they expected. This is one of the reasons Vass developed the Vass-Tex 175 range to ensure our wearers are protected from the rain, wind and extreme water sprays. Unusually lightweight yet strong and remarkably stretchy (up to 25%) this ensures comfort without restriction when casting.

Front pocket with  
funnelled storm flap

Elasticated cuffs

Fold into collar hood

Folds easily

Easy repair material

Available for this range  
See Pages 23, 24, 25 & 26 for information

The TEAM VASS 175 'Khaki Edition' Waterproofs are based on the Team Vass waterproofs which were designed and tested in the harshest of sea fishing environments. This performance, reliability and comfort were of course key to many other forms of fishing therefore the 'Khaki Edition' was born to offer a stealth-like version of the proven Team Vass 175 waterproof/breathable smock and bib 'n' brace.

### Bib 'n' Brace

VA175-13KT (Khaki Edition)

Box stitch reinforcement and quick release buckles

Double reinforced knee

# NEW TEAM VASS EDITION

## LIGHTWEIGHT VASS-TEX 175 TEAM VASS EDITION 3

Many of you are probably aware that Vass are proud to be heavily involved with many of the National and International Fishing Teams over the years. Not only has it given Vass the opportunity to support these teams but it has also helped develop and hone the Vass ranges further. The Vass range is constantly developing to cope with the extreme conditions that the Teams face during intense competitions at home and abroad. Inspired by the success of working with these top 'Teams' Vass have now launched 'TEAM VASS' editions which offer visual and technical advantages over standard models to meet the high demands of competition fishing. The Vass-Tex 175 'TEAM VASS' Edition smock features redesigned colour combination, reflective print on both shoulders and arm (for safety when fishing at night) as well as usual features that the Vass-Tex highly proven smock offers.

## Vass-Tex 'Light' Packaway Jacket and Trouser Set

The new Ultra lightweight Vass-Tex jacket and trouser is designed and developed to be compact when stowed away. Ensuring that you can always have a set of waterproofs with you should the weather turn. Although not as hard-core as the rest of the Vass range this lightweight set is technically top of its market class offering 4000wp water resistance as well as a high breathability rating of 4000mvp.

# EXTREME WATERPROOFS/ COMMERCIAL OIL SKINS

Originally designed and manufactured for use by commercial fisherman this range has now become popular amongst Extreme Sea Fishermen. The 'Vass-Tex 550 Series' is a result of many years of market feedback which has helped Vass develop possibly the best heavy duty waterproof available today. Due to its hard wearing yet flexible properties the 'Vass-Tex 550 series' provides Extreme 100% Water Protection as well as maintaining the highest level of comfort for the wearer.

\*LOGGING SERVICES USUALLY TAKE FROM 5-12 WORKING DAYS FROM APPROVAL OF ARTWORK. MINIMUM ORDER IS 20 ITEMS PER RUN (I.E. 20 SMOCKS). THIS SERVICE IS ONLY AVAILABLE ON CLOTHING SUPPLIED BY VASS.

# PUNCTURE REPAIR TIPS

*from the trade!*

This is an alternative method to patching which offers a neat and very reliable repair on our quality PVC Waders and Vass-Tex 170, 175, 350 Waterproofs and Vass Tex 305 Breathable Waders.

### Step 1

Locate the damaged area on fabric.

### Step 2

Using masking tape, tape over the damaged area. This ensures that the repair sealant doesn't leak through on the larger holes and tears.

### Step 3

Fold the wader to access the reverse of the fabric. Then lay this area in a flat position ready for Step 4.

Note: The fabric reverse provides an ideal bonding area for the sealant and ensures a nicer looking repair from the outside.

### Step 4

Apply Wader Repair Sealant to the damaged area on the reverse of the Wader. Allow to dry (see Sealant Manufacturer's instructions for drying time, it's usually 8-12 hours unless a rapid set sealant is used).

### Step 5

Once dry, check the repair has been successful, if another coat is required repeat step 3 and 4.

### Using Waders Safely

Deep water can be dangerous! By using any waders, sea boots or coveralls with welded boots you have an increased risk of sinking should the water pour into the inside of the wader. Therefore, if you fall overboard, wade in too deep (water level is higher than the top of your wader) the waders will fill with water. Should this happen the remaining air in the waders can lift your legs to the surface and possibly submerge your head under the water surface. A rescue from this situation is difficult without help from another person or an adequate safety method. If this unusual event should occur please remain calm and release your waders from your body and swim to safety. Remember you can always collect your equipment and waders once you have ensured your own safety! We always recommend using a safety Self Inflating Life Vest which automatically inflates if you fall in.

We hope you enjoy your wader experience in safety.  
Regards
